

# SCAN COIN CDS9

## Multifunctional cash recycling

SCAN COIN was the first company in the market to introduce the CDS concept in 1987. We are now leading in self-service CDS solutions with more than 20,000 machines worldwide. The many years' experience have given us unique knowledge which is now put into the fourth generation of CDS.

The new cash recycling machine, CDS9, offers the modern company the most secure, reliable and effective way to handle self-service cash transactions for both coins and notes.

# Self-service transactions have never been easier and more reliable!

The CDS9 offers complete cash handling service for coin and note transactions. In a secure and rapid way the machine handles bulk coin deposits as well as bundle note deposits and withdrawals. This will give the bank, transport or retail company the optimal cash automation tool for servicing their customers or staff members.

## ▶ Highest reliability and uptime

The CDS9 is built around the best coin and note technology, offering you a premium product. User interface and technology have been carefully developed, tested and verified to give trouble free operations with the absolute highest reliability and maximum uptime.

## ▶ Designed for best customer experience

With the latest machine design the CDS9 comes with two clear and reliable 15" touch screens with tablet-feeling. One for the user and one on the rear side for the operator. The interaction between the user and the machine is carefully thought through with clear illuminated indicators. The overall design is well suited for best accessibility for people with disabilities.

## ▶ Security in focus

The cash is securely stored in the safes which are available both as front and rear access. The machine follows the requirements stated by both ETSC and ECB framework for the EUR-zone and the latest anti manipulation technology comes with the card reader. The machines are equipped with awareness mirrors for preventing shoulder surfing and are prepared for any type of surveillance and portrait cameras, all to make usage safe and pleasant.

## ▶ Full connectivity

Through our unique software the machine can be connected on-line to any existing network and be monitored from any remote position.
